

Technology Training

Designed to help employees get the most of NIH's computer and network resources, CIT's training offers courses to NIH staff and those who use CIT computing facilities.

OFFERINGS

High Performance Computing Training

NIH employees can learn about Biowulf and other scientific applications and tools through our [high-performance computing training](#).

Office Productivity

Courses available through the [Technology Training Program](#) include training in desktop applications, professional development, NIH-wide enterprise applications, Section 508 accessibility, security, and project management, as well as seminars for scientists in statistics and programming languages. Courses are free to NIH employees. We also support special events and trainings for a fee.
